

Allow students to rework assignment for credit

You can now reset a student's work on an entire assignment and allow the student to rework the assignment for credit.

Use Rework for Credit when a single student has difficulty with an entire assignment.

Rework for Credit resets one assignment for a single student, so that they can have another chance.

Rework for Credit erases the student's previous grade and work. They cannot be retrieved.

If many students have the same difficulty on an item or part, use Grant Full Credit instead.

This grants every student credit for a single part. They get 100% on the part and can view their previous work.

See the "Grant Full Credit" video for details.

1. In the Gradebook, click the student's grade for the assignment.
2. Scroll to the bottom of the page.
3. Click **Reset assignment**.

Reset Assignment:

Delete all work for this assignment and allow student to restart

4. **Save.**

The student is now able to rework the entire assignment for credit.
